- The first step for the user is to visit the https://go.leaddetector.io/start-trial-1 page.

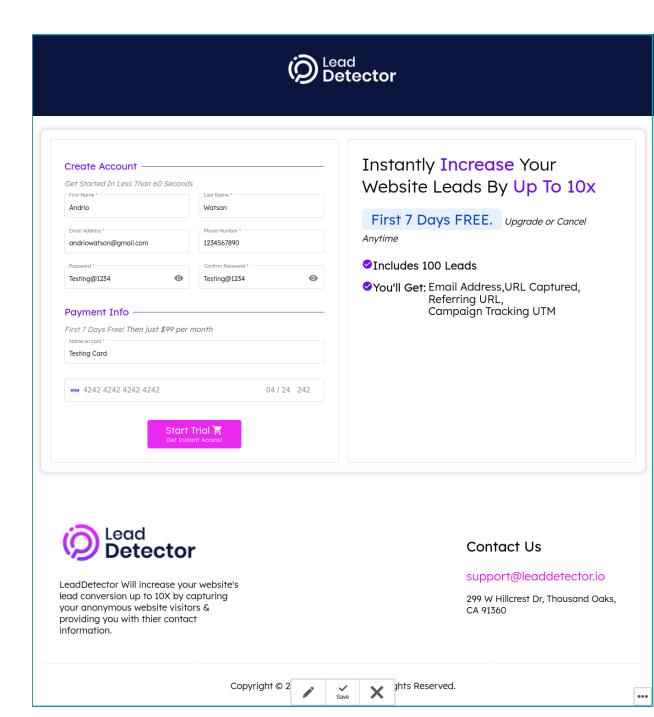

- After that, the user needs to click on the "Start Free Trial" button. Once clicked, a popup will open as shown below.

- After filling out all required fields and clicking the **Continue** button, you will be redirected to

  https://app.leaddetector.io/payment/free-trial?email=andriowatson@gmail.com

- After filling out all required fields and clicking the **Start Trial** button, the user can begin their 7-day free trial period.

- In this scenario, we have a setup that includes the promo code **7days.** This promo code is applied automatically and remains hidden from the user interface. When applied, the start date is set to the current date, the end date is set to seven days from the start date, and the next charge date is also set to seven days from the start date. This ensures that

users receive a seven-day trial period starting from their sign-up date before any charges are applied to their account.

- We have checked if the user's setup card has a sufficient amount or not. If a sufficient amount is found, then the user can access the dashboard.

- After 7 days, we will automatically charge the setup card for the user selected package amount.
